Printed in Great Britain

Contents for Volume 161

Number 1, 7 *March* 1993

Qi, A.-S., Zheng, X., Du, C.-Y. and An, B.-S., A Cellular Automaton Model of Cancerous Growth 1

Kim, Y.-G., Evolutionary Stability in the Asymmetric War of Attrition . 13

McNamara, J. M., Evolutionary Paths in Strategy Space: An Improvement Algorithm for Life-history Strategies 23

Suda, H. and Taylor, T. W., Intermolecular Forces Between the Motor Protein and the Filament 39

Birkhead, T. R., Møller, A. P. and Sutherland, W. J., Why do Females Make it so Difficult for Males to Fertilize their Eggs? 51

Ennos, A. R., The Scaling of Root Anchorage 61

Kemp, G. J. and Bevington, A., The Regulation of Intracellular Orthophosphate Concentration 77

Nee, S. and May, R. M., Population-level Consequences of Conspecific Brood Parasitism in Birds and Insects 95

Yamamura, N., Different Evolutionary Conditions for Worker and Soldier Castes: Genetic Systems Explaining Caste Distribution among Eusocial Insects 111

Rose, M. R. and Moore, C., A Darwinian Function for the Orbital Cortex 119

Letter to the Editor

Dye, C. and Godfray, H. C. F., On Sex Ratio and Inbreeding in Malaria Parasite Populations 131

Number 2, 21 *March* 1993

Bains, W., Local Self-similarity of Sequence in Mammalian Nuclear DNA is Modulated by a 180 bp Periodicity 137

Bovet, J. and Bovet, P., Computer-simulations of Rodent Homing Behavior, Using a Probabilistic Model 145

Bruni, C., Ferrante, L., Koch, G., Scoglio, C. and Starace, G., A Stochastic Model for Cell Debris in Flow Cytometry 157

Colmenares, P. J., Role of a Stochastic Friction Coefficient in Open Channel Noise 175

Muller, M., The Relationship Between the Rotation Possibilities Between Femur and Tibia and the Lengths of the Cruciate Ligaments . . 199

Muller, M., The Angles of Femoral and Tibial Axes with Respect to the Cruciate Ligament Four-bar System in the Knee Joint 221

Bignone, F. A., Cells–Gene Interactions Simulation on a Coupled Map Lattice 231

Chou, J. J. and Zhang, C.-T., A Joint Prediction of the Folding Types of 1490 Human Proteins from their Genetic Codons 251

Allison, L., Normalization of Affine Gap Costs Used in Optimal Sequence Alignment 263

Number 3, 7 *April* 1993

Panfilov, A. V. and Holden, A. V., Computer Simulation of Re-entry Sources in Myocardium in Two and Three Dimensions 271

Cheetham, T., Adaptation on Fluctuating Fitness Landscapes: Speciation and the Persistence of Lineages 287

Palsson, B. O. and Lee, I.-D., Model Complexity has a Significant Effect on the Numerical Value and Interpretation of Metabolic Sensitivity Coefficients 299

Williams, J. M., Objective Comparisons of Song Syllables: A Dynamic Programming Approach 317

Arquès, D. G., Michel, C. J. and Orieux, K., Identification and Simulation of New Non-random Statistical Properties Common to Different Populations of Eukaryotic Non-coding Genes 329

Solé, R. V., Miramontes, O. and Goodwin, B. C., Oscillations and Chaos in Ant Societies 343

Møller, A. P. and Pomiankowski, A., Punctuated Equilibria or Gradual Evolution: Fluctuating Asymmetry and Variation in the Rate of Evolution 359

West, P. W., Model of Above-ground Assimilate Partitioning and Growth of Individual Trees in Even-aged Forest Monoculture 369

SUENOBU, K., TANI, S. and IMAMURA, A., An *ab initio* Molecular Orbital Study on Effect of Electric Field Strength on Ionic Selectivity of the Sodium Channel 395

LETTER TO THE EDITOR

BOMZE, I. M. and PÖTSCHER, B. M., "On the Definition of an Evolutionarily Stable Strategy in the Playing the Field Model" by V. P. Crawford 405

Number 4, 21 *April* 1993

MILLER, R. L. and OHKAWA, T., Chain Terminator Sequencing of Double-stranded DNA with Built-in Error Correction 407

GALLINET, J. P., GIRARDOT, J. J., MASSONIE, J. PH. and LANCE, C., A Method for the Assessment of the Quality of Mitochondrial Preparations . 431

KASAI, M. and NUNOGAKI, K., Channel Opening Process is Responsible for the Slow Component in the Flux Measurement of Membrane Vesicles 461

HATTON, M. W. C., RICHARDSON, M. and WINOCOUR, P. D., On Glucose Transport and Non-enzymic Glycation of Proteins *In Vivo* . . 481

SPIROV, A. V., The Change of Initial Symmetry in the Pattern-form Interaction Model of Sea Urchin Gastrulation 491

KARSAI, I. and PÉNZES, Z., Comb Building in Social Wasps: Self-organization and Stigmergic Script 505

JONES, R. E., SMITH, H. M. and BOCK, C. E., Reptilian and Avian Ovarian Cycles and the Evolutionary Origin of Volant Birds 527

LETTER TO THE EDITOR

CAMARGO, J. A., Must Dominance Increase with the Number of Subordinate Species in Competitive Interactions? 537

Index to Volume 161

Adaptation on fluctuating fitness landscapes; speciation and the persistence of lineages, 287
Affine gap costs used in optimal sequence alignment, normalization of, 263
ALLISON, L., Normalization of affine gap costs used in optimal sequence alignment, 263
AN, B.-S. (see QI, A.-S.), 1
Ant societies; oscillations and chaos, 343
ARQUÈS, D. G., MICHEL, C. J. and ORIEUX, K., Identification and simulation of new non-random statistical properties common to different populations of eukaryotic non-coding genes, 329
Asymmetry, fluctuating, and variation in the rate of evolution, 359
Avian and reptilian ovarian cycles and the evolutionary origin of volant birds, 527

BAINS, W., Local self-similarity of sequence in mammalian nuclear DNA is modulated by a 180 bp periodicity, 137
BEVINGTON, A. (see KEMP, G. J.), 77
BIGNONE, F. A., Cells-gene interactions simulation on a coupled map lattice, 231
Birds and insects, population-level consequences of conspecific brood parasitism in, 95
Birds, volant; evolutionary origin; reptilian and avian ovarian cycles, 527
BIRKHEAD, T. R., MØLLER, A. P. and SUTHERLAND, W. J., Why do females make it so difficult for males to fertilize their eggs?, 51
BOCK, C. E. (see JONES, R. E.), 527
BOMZE, I. M. and PÖTSCHER, B. M., "On the definition of an evolutionarily stable strategy in the playing the field model" by V. P. Crawford (letter), 405
BOVET, J. and BOVET, P., Computer-simulations of rodent homing behavior, using a probabilistic model, 145
BOVET, P. (see BOVET, J.), 145
Brood and parasitism in birds and insects, population-level consequences of, 95
BRUNI, C., FERRANTE, L., KOCH, G., SCOGLIO, C. and STARACE, G., A stochastic model for cell debris in flow cytometry, 157
Building, comb, in social wasps; self-organization and stigmergic script, 505

CAMARGO, J. A., Must dominance increase with the number of subordinate species in competitive interactions? (letter), 537
Cancerous growth, a cellular automaton model of, 1
Castes, worker and soldier, evolutionary conditions for, 111
Cell debris in flow cytometry, a stochastic model for, 157
Cells-gene interactions simulation on a coupled map lattice, 231
Cellular automaton model of cancerous growth, 1
Chain terminator sequencing of double-stranded DNA with built-in error correction, 407
Channel noise; role of stochastic friction coefficient, 175
Channel opening process is responsible for the slow component in the flux measurement of membrane vesicles, 461
Channel, sodium, effect of electric field strength on ionic selectivity of, 395
Chaos and oscillations in ant societies, 343
CHEETHAM, T., Adaptation on fluctuating fitness landscapes: speciation and the persistence of lineages, 287
CHOU, J. J. and ZHANG, C.-T., A joint prediction of the folding types of 1490 human proteins from their genetic codons, 251
COLMENARES, P. J., Role of a stochastic friction coefficient in open channel noise, 175

Comb building in social wasps: self-organization and stigmergic script, 505
Competitive interactions: must dominance increase with the number of subordinate species? (letter), 537
Complexity, model, has a significant effect on the numerical value and interpretation of metabolic sensitivity coefficients, 299
Computer simulation of re-entry sources in myocardium in two and three dimensions, 271
Computer simulations of rodent homing behavior, using a probabilistic model, 145
Costs, affine gap, used in optimal sequence alignment, normalization of, 263

Darwinian function for the orbital cortex, 119
DNA, double-stranded, chain terminator sequencing of, with built-in error correction, 407
DNA, nuclear, mammalian; local self-similarity of sequence is modulated by a 180 bp periodicity, 137
Dominance: must it increase with the number of subordinate species in competitive interactions? (letter), 537
Du, C.-Y. (see Qi, A.-S.), 1
Dye, C. and Godfray, H. C. F., On sex ratio and inbreeding in malaria parasite populations (letter), 131

Egg fertilization by males, why do females make it so difficult?, 51
Electric field strength, effect on ionic selectivity of the sodium channel, 395
Ennos, A. R., The scaling of root anchorage, 61
Eukaryotic non-coding genes; statistical properties common to different populations, 329
Eusocial insects, genetic systems explaining caste distribution among, 111
Evolution rate, fluctuating asymmetry and variation in, 359
"Evolutionarily stable strategy in the playing the field model, on the definition of" by V. P. Crawford (letter), 405
Evolutionary conditions, different, for worker and soldier castes; genetic systems, 111
Evolutionary origin of volant birds; reptilian and avian ovarian cycles, 527
Evolutionary paths in strategy space: an improvement algorithm for life-history strategies, 23
Evolutionary stability in the asymmetric war of attrition, 13

Females, why do they make it so difficult for males to fertilize their eggs?, 51
Femoral and tibial axes angles with respect to the cruciate ligament four-bar system in the knee joint, 221
Femur and tibia, the relationship between the rotation possibilities between, and the lengths of the cruciate ligaments, 199
Ferrante, L. (see Bruni, C.), 157
Fertilization of eggs by males, why do females make it so difficult?, 51
Filament, intermolecular forces between the motor protein and, 39
Flow cytometry, a stochastic model for cell debris in, 157
Friction coefficient, stochastic; role in open channel noise, 175

Gallinet, J. P., Girardot, J. J., Massonie, J. Ph. and Lance, C., A method for the assessment of the quality of mitochondrial preparations, 431
Gastrulation, sea urchin, the change of initial symmetry in the pattern-form interaction model of, 491
Gene-cells interactions simulation on a coupled map lattice, 231
Genes, non-coding, eukaryotic; statistical properties common to different populations, 329
Genetic codons, a joint prediction of the folding types of 1490 human proteins from, 251
Girardot, J. J. (see Gallinet, J. P.), 431
Glucose transport and non-enzymic glycation of proteins *in vivo*, 481
Glycation, non-enzymic, of proteins *in vivo*, and glucose transport, 481
Godfray, H. C. F. (see Dye, C.), 131

Goodwin, B. C. (see Solé, R. V.), 343
Growth, cancerous, a cellular automaton model of, 1
Growth of individual trees in even-aged forest monoculture, 369

Hatton, M. W. C., Richardson, M. and Winocour, P. D., On glucose transport and non-enzymic glycation of proteins *in vivo*, 481
Holden, A. V. (see Panfilov, A. V.), 271
Homing behaviour of rodents; computer simulations using a probabilistic model, 145

Imamura, A. (see Suenobu, K.), 395
Inbreeding and sex ratio in malaria parasite populations (letter), 131
Insects and birds, population-level consequences of conspecific brood parasitism in, 95
Insects, eusocial, genetic systems explaining caste distribution among, 111
Intermolecular forces between the motor protein and the filament, 39
Intracellular orthophosphate concentration, regulation of, 77

Jones, R. E., Smith, H. M. and Bock, C. E., Reptilian and avian ovarian cycles and the evolutionary origin of volant birds, 527

Karsai, I. and Pénzes, Z., Comb building in social wasps: self-organization and stigmergic script, 505
Kasai, M. and Nunogaki, K., Channel opening process is responsible for the slow component in the flux measurement of membrane vesicles, 461
Kemp, G. J. and Bevington, A., The regulation of intracellular orthophosphate concentration, 77
Kim, Y.-G., Evolutionary stability in the asymmetric war of attrition, 13
Knee joint, the angles of femoral and tibial axes with respect to the cruciate ligament four-bar system in, 221
Knee joint: the relationship between the rotation possibilities between femur and tibia and the lengths of the cruciate ligaments, 199
Koch, G. (see Bruni, C.), 157

Lance, C. (see Gallinet, J. P.), 431
Lee, I.-D. (see Palsson, B. O.), 299
Life-history strategies, an improvement algorithm for; evolutionary paths in strategy space, 23
Lineage persistence and speciation; adaptation on fluctuating fitness landscapes, 287

McNamara, J. M., Evolutionary paths in strategy space: an improvment algorithm for life-history strategies, 23
Malaria parasite populations, on sex ratio and inbreeding in (letter), 131
Male fertilization of eggs, why do females make it so difficult?, 51
Mammalian nuclear DNA, local self-similarity of sequence is modulated by a 180 bp periodicity, 137
Massonie, J. Ph. (see Gallinet, J. P.), 431
May, R. M. (see Nee, S.), 95
Membrane vesicles, channel opening process is responsible for the slow component in the flux measurement of, 461
Metabolic sensitivity coefficients, model complexity has a significant effect on numerical value and interpretation of, 299
Michel, C. J. (see Arquès, D. G.), 329
Miller, R. L. and Ohkawa, T., Chain terminator sequencing of double-stranded DNA with built-in error correction, 407
Miramontes, O. (see Solé, R. V.), 343
Mitochondrial preparations, a method for the assessment of the quality of, 431

Molecular orbital study on effect of electric field strength on ionic selectivity of the sodium channel, 395
MØLLER, A. P. and POMIANKOWSKI, A., Punctuated equilibria or gradual evolution: fluctuating asymmetry and variation in the rate of evolution, 359
MØLLER, A. P. (see BIRKHEAD, T. R.), 51
MOORE, C. (see ROSE, M. R.), 119
Motor protein and the filament, intermolecular forces between, 39
MULLER, M., The angles of femoral and tibial axes with respect to the cruciate ligament four-bar system in the knee joint, 221
MULLER, M., The relationship between the rotation possibilities between femur and tibia and the lengths of the cruciate ligaments, 199
Myocardium, computer simulation of re-entry sources in, in two and three dimensions, 271

NEE, S. and MAY, R. M., Population-level consequences of conspecific brood parasitism in birds and insects, 95
Noise, open channel, role of a stochastic friction coefficient in, 175
NUNOGAKI, K. (see KASAI, M.), 461

OHKAWA, T. (see MILLER, R. L.), 407
Orbital cortex, a Darwinian function for, 119
ORIEUX, K. (see ARQUÈS, D. G.), 329
Orthophosphate concentration, intracellular, regulation of, 77
Oscillations and chaos in ant societies, 343
Ovarian cycles, reptilian and avian, and the evolutionary origin of volant birds, 527

PALSSON, B. O. and LEE, I.-D., Model complexity has a significant effect on the numerical value and interpretation of metabolic sensitivity coefficients, 299
PANFILOV, A. V. and HOLDEN, A. V., Computer simulation of re-entry sources in myocardium in two and three dimensions, 271
Pattern—form interaction model of sea urchin gastrulation, the change of initial symmetry in, 491
PÉNZES, Z. (see KARSAI, I.), 505
"Playing the field model, on the definition of an evolutionarily stable strategy in", by V. P. Crawford (letter), 405
POMIANKOWSKI, A. (see MØLLER, A. P.), 359
Population-level consequences of conspecific brood parasitism in birds and insects, 95
PÖTSCHER, B. M. (see BOMZE, I. M.), 405
Proteins, glucose transport and non-enzymic glycation of, 481
Proteins, human, 1490; joint prediction of the folding types from their genetic codons, 251
Protein, motor, and the filament, intermolecular forces between, 39

QI, A.-S., ZHENG, X., DU, C.-Y. and AN, B.-S., A cellular automaton model of cancerous growth, 1

Regulation of intracellular orthophosphate concentration, 77
Reptilian and avian ovarian cycles and the evolutionary origin of volant birds, 527
RICHARDSON, M. (see HATTON, M. W. C.), 481
Rodent homing behavior: computer simulations using a probabilistic model, 145
Root anchorage, scaling of, 61
ROSE, M. R. and MOORE, C., A Darwinian function for the orbital cortex, 119

Scaling of root anchorage, 61
SCOGLIO, C. (see BRUNI, C.), 157

Sea urchin gastrulation, the change of initial symmetry in the pattern-form interaction model of, 491
Self-organization and comb building in social wasps, 505
Sequence alignment, optimal, normalization of affine gap costs used in, 263
Sequence local self-similarity in mammalian nuclear DNA is modulated by a 180 bp periodicity, 137
Sequencing, chain terminator, of double-stranded DNA, with built-in error correction, 407
Sex ratio and inbreeding in malaria parasite populations (letter), 131
SMITH, H. M. (see JONES, R. E.), 527
Sodium channel, effect of electric field strength on ionic selectivity of, 395
SOLÉ, R. V., MIRAMONTES, O. and GOODWIN, B. C., Oscillations and chaos in ant societies, 343
Song syllables; objective comparisons; dynamic programming, 317
Speciation and the persistance of lineages; adaptation on fluctuating fitness landscapes, 287
SPIROV, A. V., The change of initial symmetry in the pattern-form interaction model of sea urchin gastrulation, 491
STARACE, G. (see BRUNI, C.), 157
Stigmergic script and comb building in social wasps, 505
Strategy space, evolutionary paths in; an improvement algorithm for life-history strategies, 23
SUDA, H. and TAYLOR, T. W., Intermolecular forces between the motor protein and the filament, 39
SUENOBU, K., TANI, S. and IMAMURA, A., An *ab initio* molecular orbital study on effect of electric field strength on ionic selectivity of the sodium channel, 395
SUTHERLAND, W. J. (see BIRKHEAD, T. R.), 51
Symmetry, initial, change of, in the pattern-form interaction model of sea urchin gastrulation, 491

TANI, S. (see SUENOBU, K.), 395
TAYLOR, T. W. (see SUDA, H.), 39
Tibia and femur, the relationship between the rotation possibilities between, and the lengths of the cruciate ligaments, 199
Tibial and femoral axes with respect to the cruciate ligament four-bar system in the knee joint, 221
Trees, individual, in even-aged forest monoculture, model of above-ground assimilate partitioning and growth of, 369

Vesicles, membrane, channel opening process is responsible for the slow component in the flux measurement of, 461

War of attrition, asymmetric, evolutionary stability in, 13
Wasps, social, comb building in; self-organization and stigmergic script, 505
WEST, P. W., Model of above-ground assimilate partitioning and growth of individual trees in even-aged forest monoculture, 369
WILLIAMS, J. M., Objective comparisons of song syllables: a dynamic programming approach, 317
WINOCOUR, P. D. (see HATTON, M. W. C.), 481

YAMAMURA, N., Different evolutionary conditions for worker and soldier castes: genetic systems explaining caste distribution among eusocial insects, 111
ZHANG, C.-T. (see CHOU, J. J.), 251
ZHENG, X. (see QI, A.-S.), 1
